

Immaculate Conception Church Restoration Building Committee

Minutes for May 18, 2011

Voting members in attendance: Ramon Torres, Martin Romero, Carlos Sanchez, Rick Trujillo, Brandon Jaramillo and Del Chavez

Archbishop's Preservation Commission Representative: none

Finance Council Representative: none

Other Participants: none

The meeting was called to order by Chairman Torres and the minutes for the meeting of April 27, 2011 were read and accepted.

The date of June 12, 2011 at 3:00 pm has been approved for presenting an update on the restoration process to all interested parishioners. The presentation will be held in the parish hall and will cover what has been accomplished and where we think we need to be headed in the continued restoration of the Church building. After the formal presentation an ice cream social will be held. Renee Sanchez with the help from other parishioners will help procure the necessary items and assistance for the ice cream social.

Carlos presented a draft of the power point presentation and as a committee we fine-tuned the information. The parish office has been provided with an announcement / invitation (sample) for placement in the church bulletin for the dates of May 29, and June 5, 2011.

Ramon will commence the presentation with the history of the Church building and Martin will follow-up as Facilitator of the presentation. He will call upon committee members to provide more detailed information on the restoration process as questions arise. Set-up for the presentation will be at 1:00 pm on Sunday June 12, 2011.

Discussion turned to the scaffolding-- price and set-up. Both Brandon and Rick had conversations with Territorial a well known company for this type of work. An official bid was not available. Rick offered to get one in writing from Territorial to be presented at our next meeting.

Martin and Ramon meet with Pat Taylor an authority on preservation of historic buildings. Martin will be working to put together a scope of work for a request for proposal from Pat

Taylor and others for placement of the earthen plaster throughout the church building and walls.

Ramon Torres has an email address -- tomenm@gmail.com

No date was set for the next committee meeting.

Meeting adjourned.
